

Dear Hatch Team,

I am excited to apply for the Rail Systems Co-op position for Fall 2025. As a Electrical and Computer Engineering student at Rutgers University on an accelerated track, I have always been drawn to the intersection of infrastructure and smart systems and Hatch's work in shaping sustainable transportation directly aligns with those interests.

My academic background includes hands on experience with Java, Python, SQL, and machine learning frameworks, which I have applied to projects like fake news detection tools and AI health chatbots. I enjoy building things that make a real difference and solving problems that require both creativity and technical skill.

I am looking for a collaborative environment like Hatch where I can continue learning, contribute meaningfully, and see how innovative engineering is applied to real-world systems. Thank you for considering my application. I would love the opportunity to speak further.

Sincerely,
Nayan Yadav
